WHO WE ARE

10 years in the affiliate marketing space.

4 years managing an affiliate network for financial offers.
\$140m in revenues.

WHY NFTIZ? *It Comes From Two Sides!*

1. As an affiliate network, we faced these challenges:

- Trust & payment issues between advertisers and publishers.

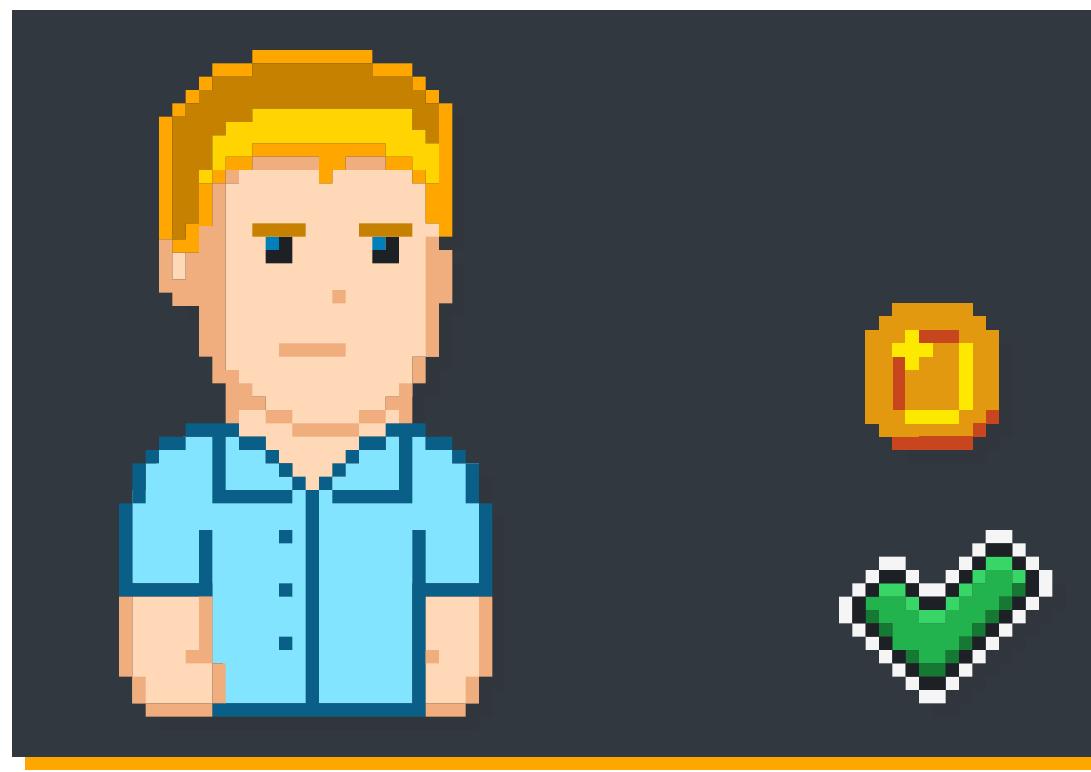

2. Starting Web3 Projects, we had issues with marketing:

- Low ROI when working with influencers.
- No tools to track performance. We couldn't do performance marketing.

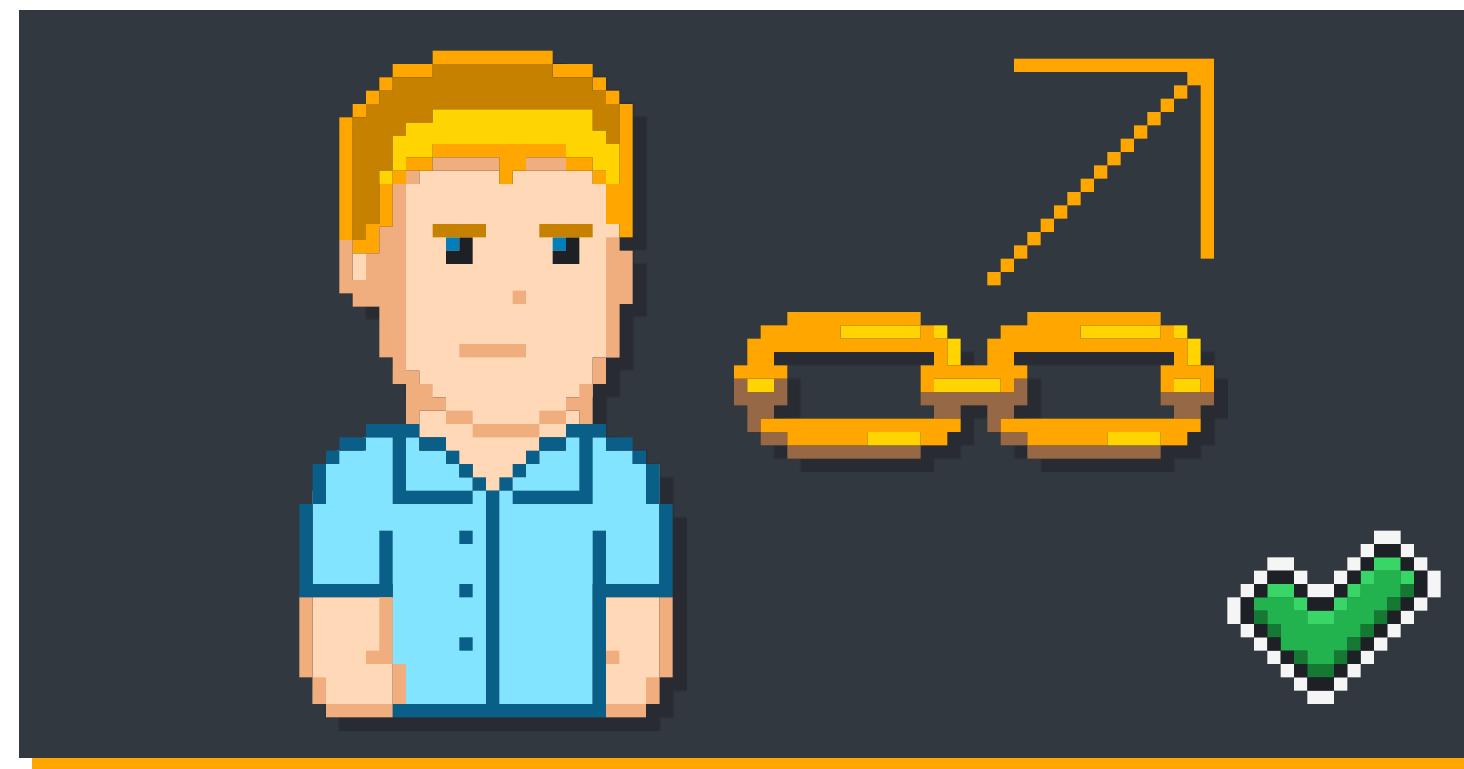

That leads us to establish NFTIZ:

- A next-generation affiliate network that leverages blockchain for trust, transparency & payments.
- An Affiliate network for web3, a growing and yet unserved industry.

WHAT IS AFFILIATE MARKETING?

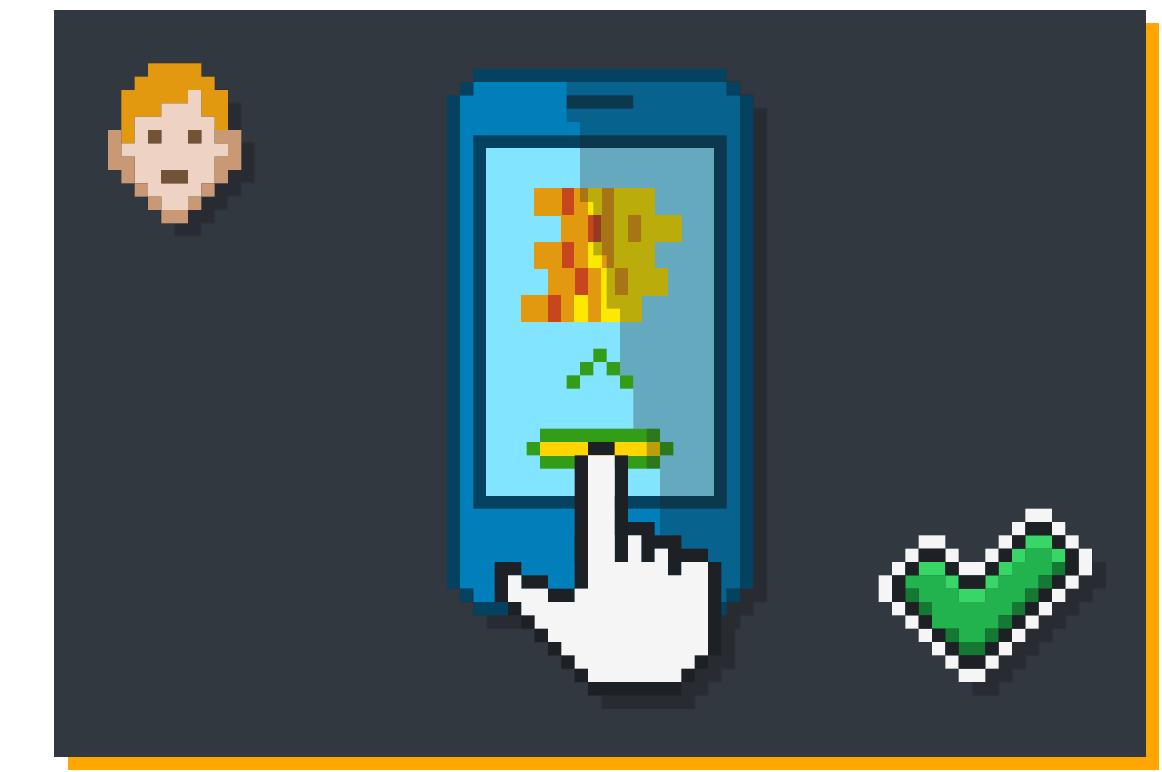

The publisher earns a commission.

The publisher shares his affiliate link.

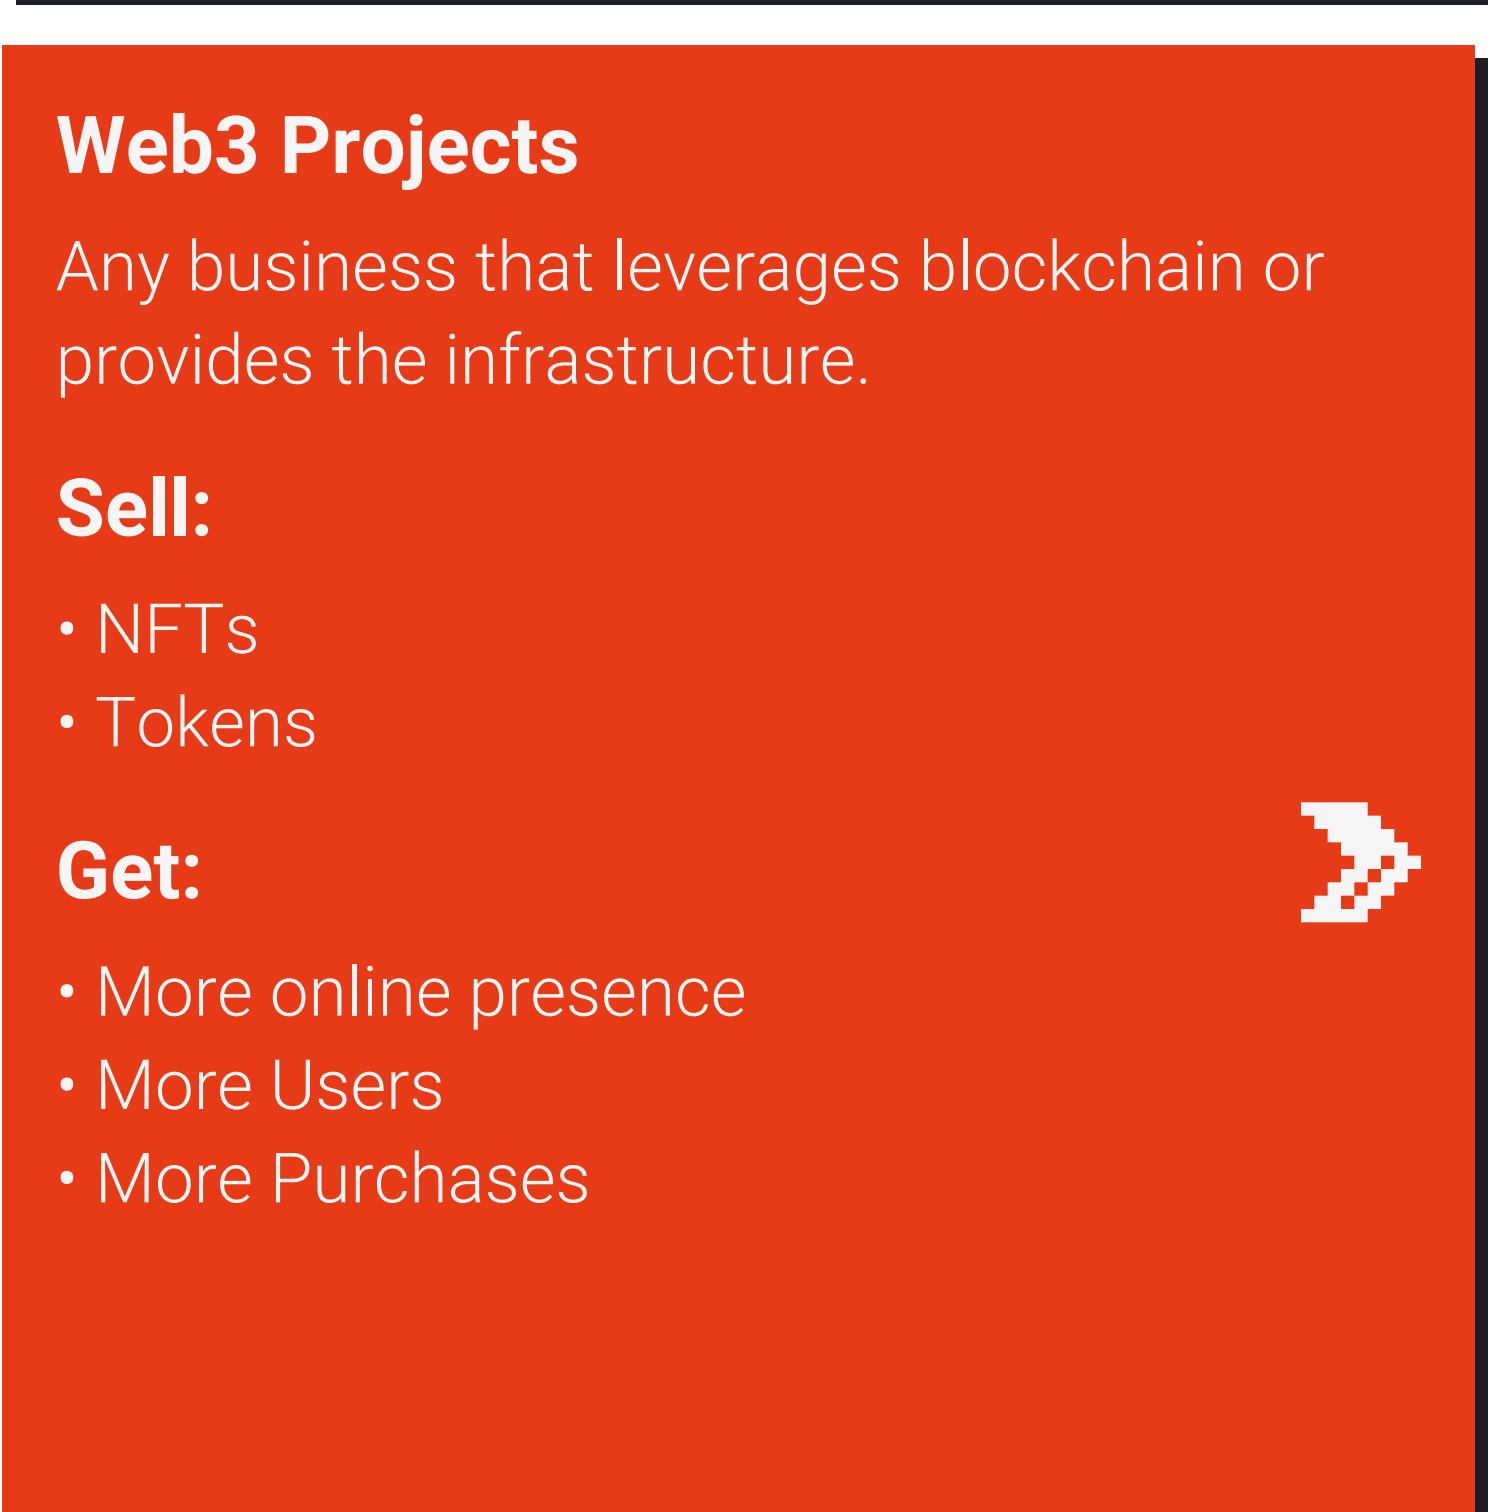

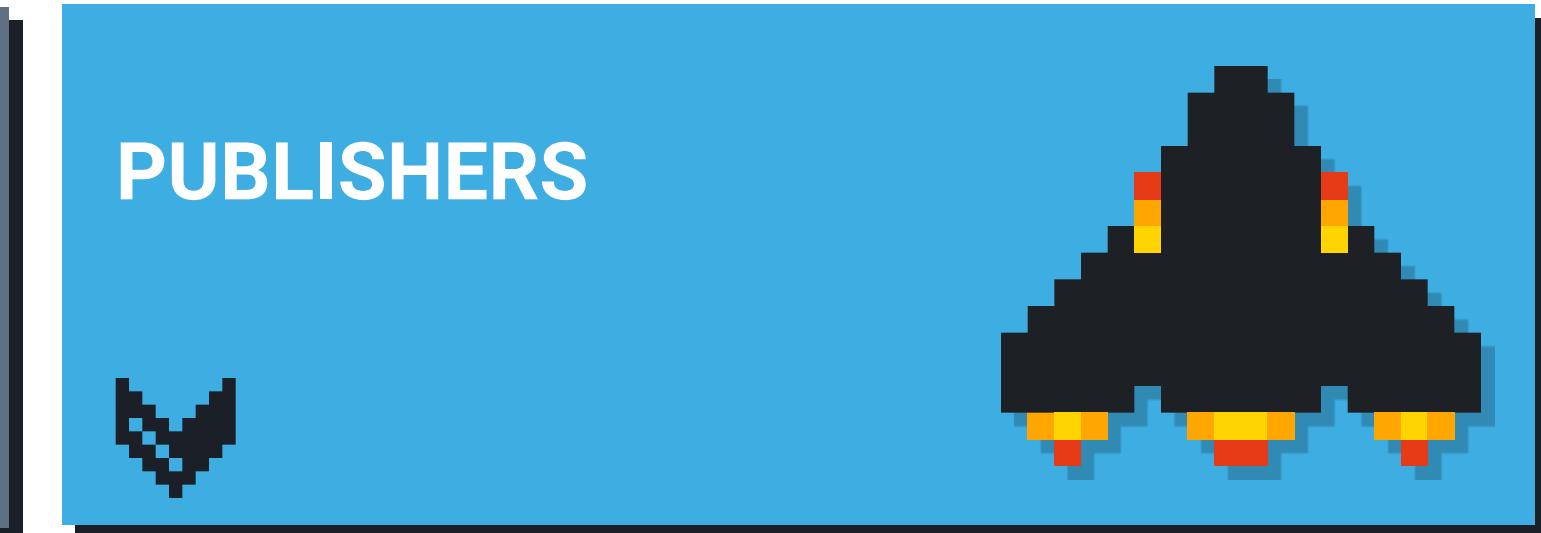

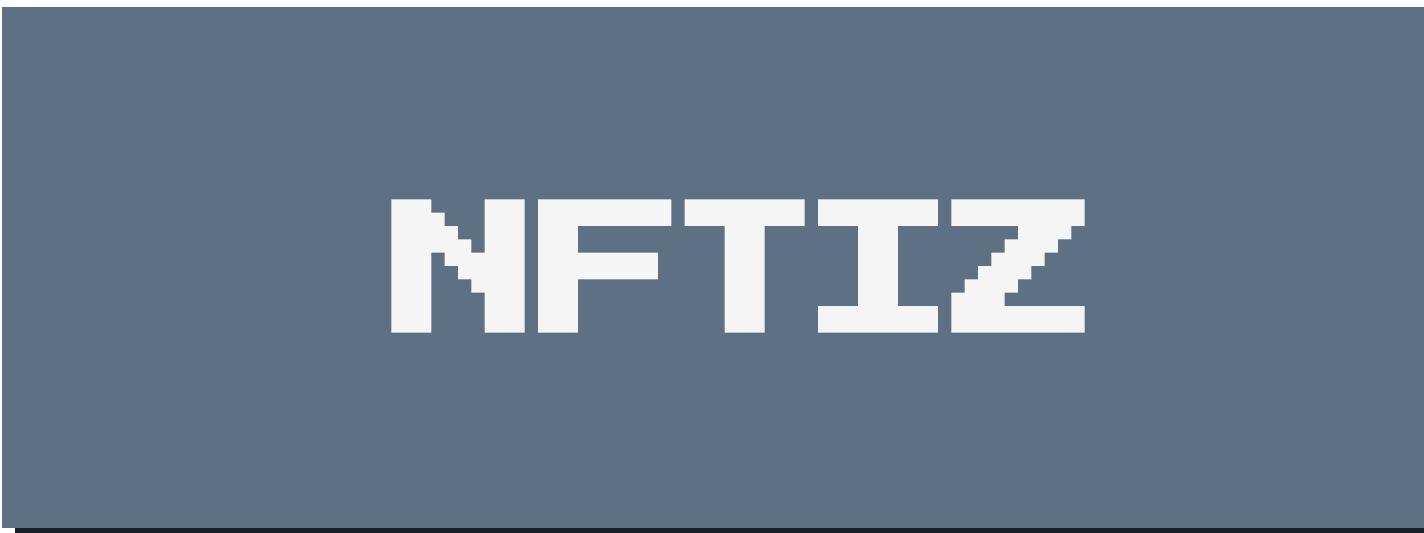

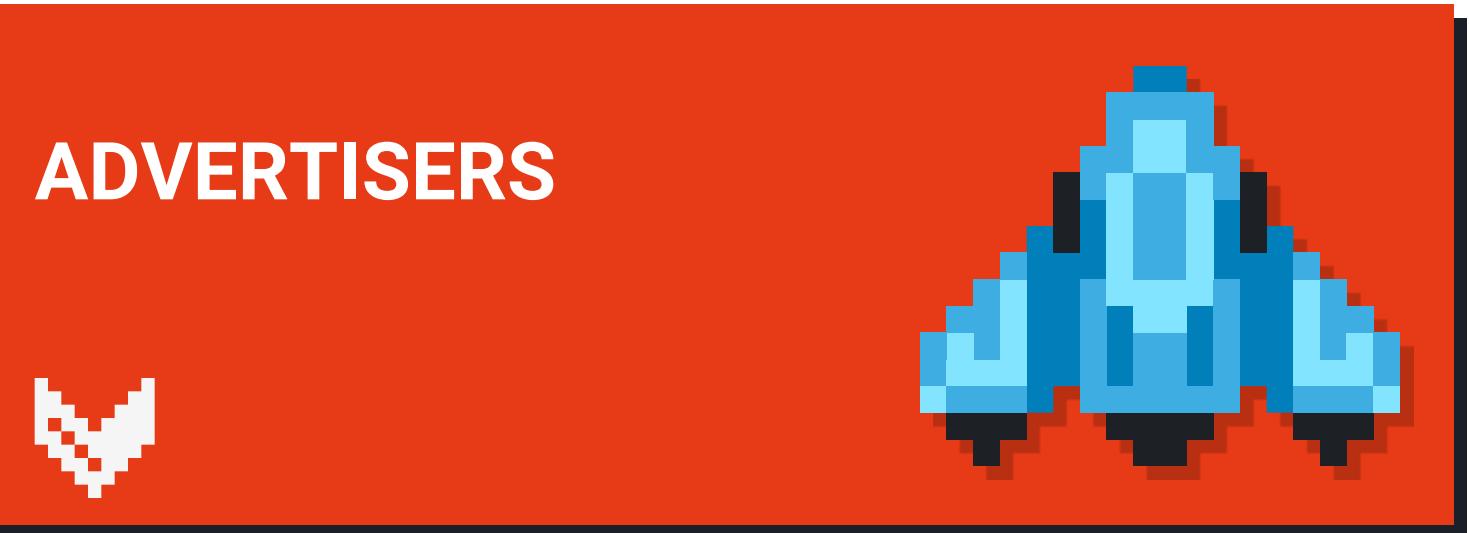

The conversion is tracked.

Users click & complete the desired action (conversion).

TARGET USERS

PAIN POINTS & SOLUTIONS - FOR ADVERTISERS

PAIN POINTS

- Advertisers usually pay upfront, without a guarantee of results. Incentives are misaligned and transactions are risky.

- Because it's not measurable it cannot scale or grow.

SOLUTION

- We build tracking solutions to make it measurable.
- We apply an affiliate marketing model: The publisher is only paid on results. We have skin in the game.

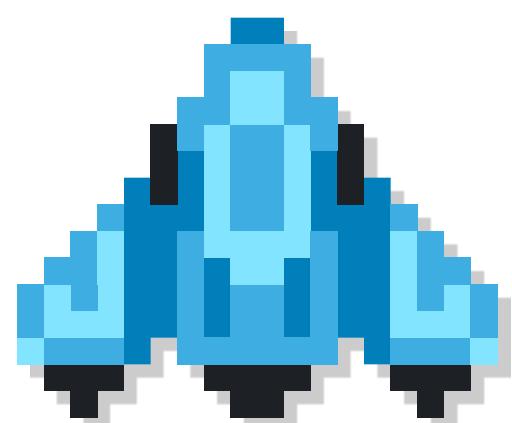

- Control acquisition cost.
- Get volume and scale fast massively.

WHAT WE DO

- Issues: **Incentive • Measurability**

- **Solutions:**

- Measure
- Control
- Scale
- No Upfront Costs

PAIN POINTS & SOLUTIONS - FOR PUBLISHERS

PAIN POINTS

- Book keeping is opaque. Publishers don't get paid fairly (an advertiser can hide the commissions).

- Payment risk. Advertisers either don't pay or are late to pay.

SOLUTION

Decentralized book keeping for transparency.

- A user's journey data is published on-chain in real-time and is verifiable.

Using a smart contract that derisks transactions and handles the payments.

- The advertising budget is locked on a smart contract.
- Publishers are paid automatically from the smart contract directly to their crypto wallet.

WHAT WE DO

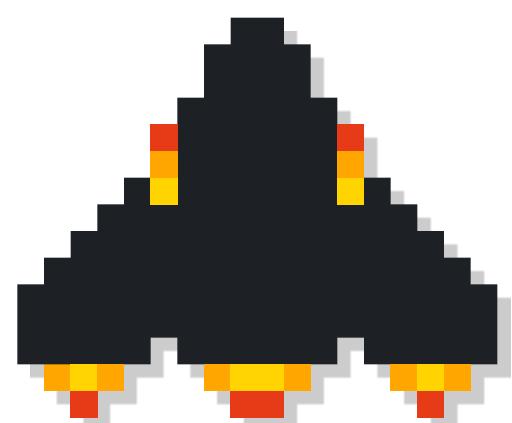

- Issues: **Trust • Transparency**

Solutions:

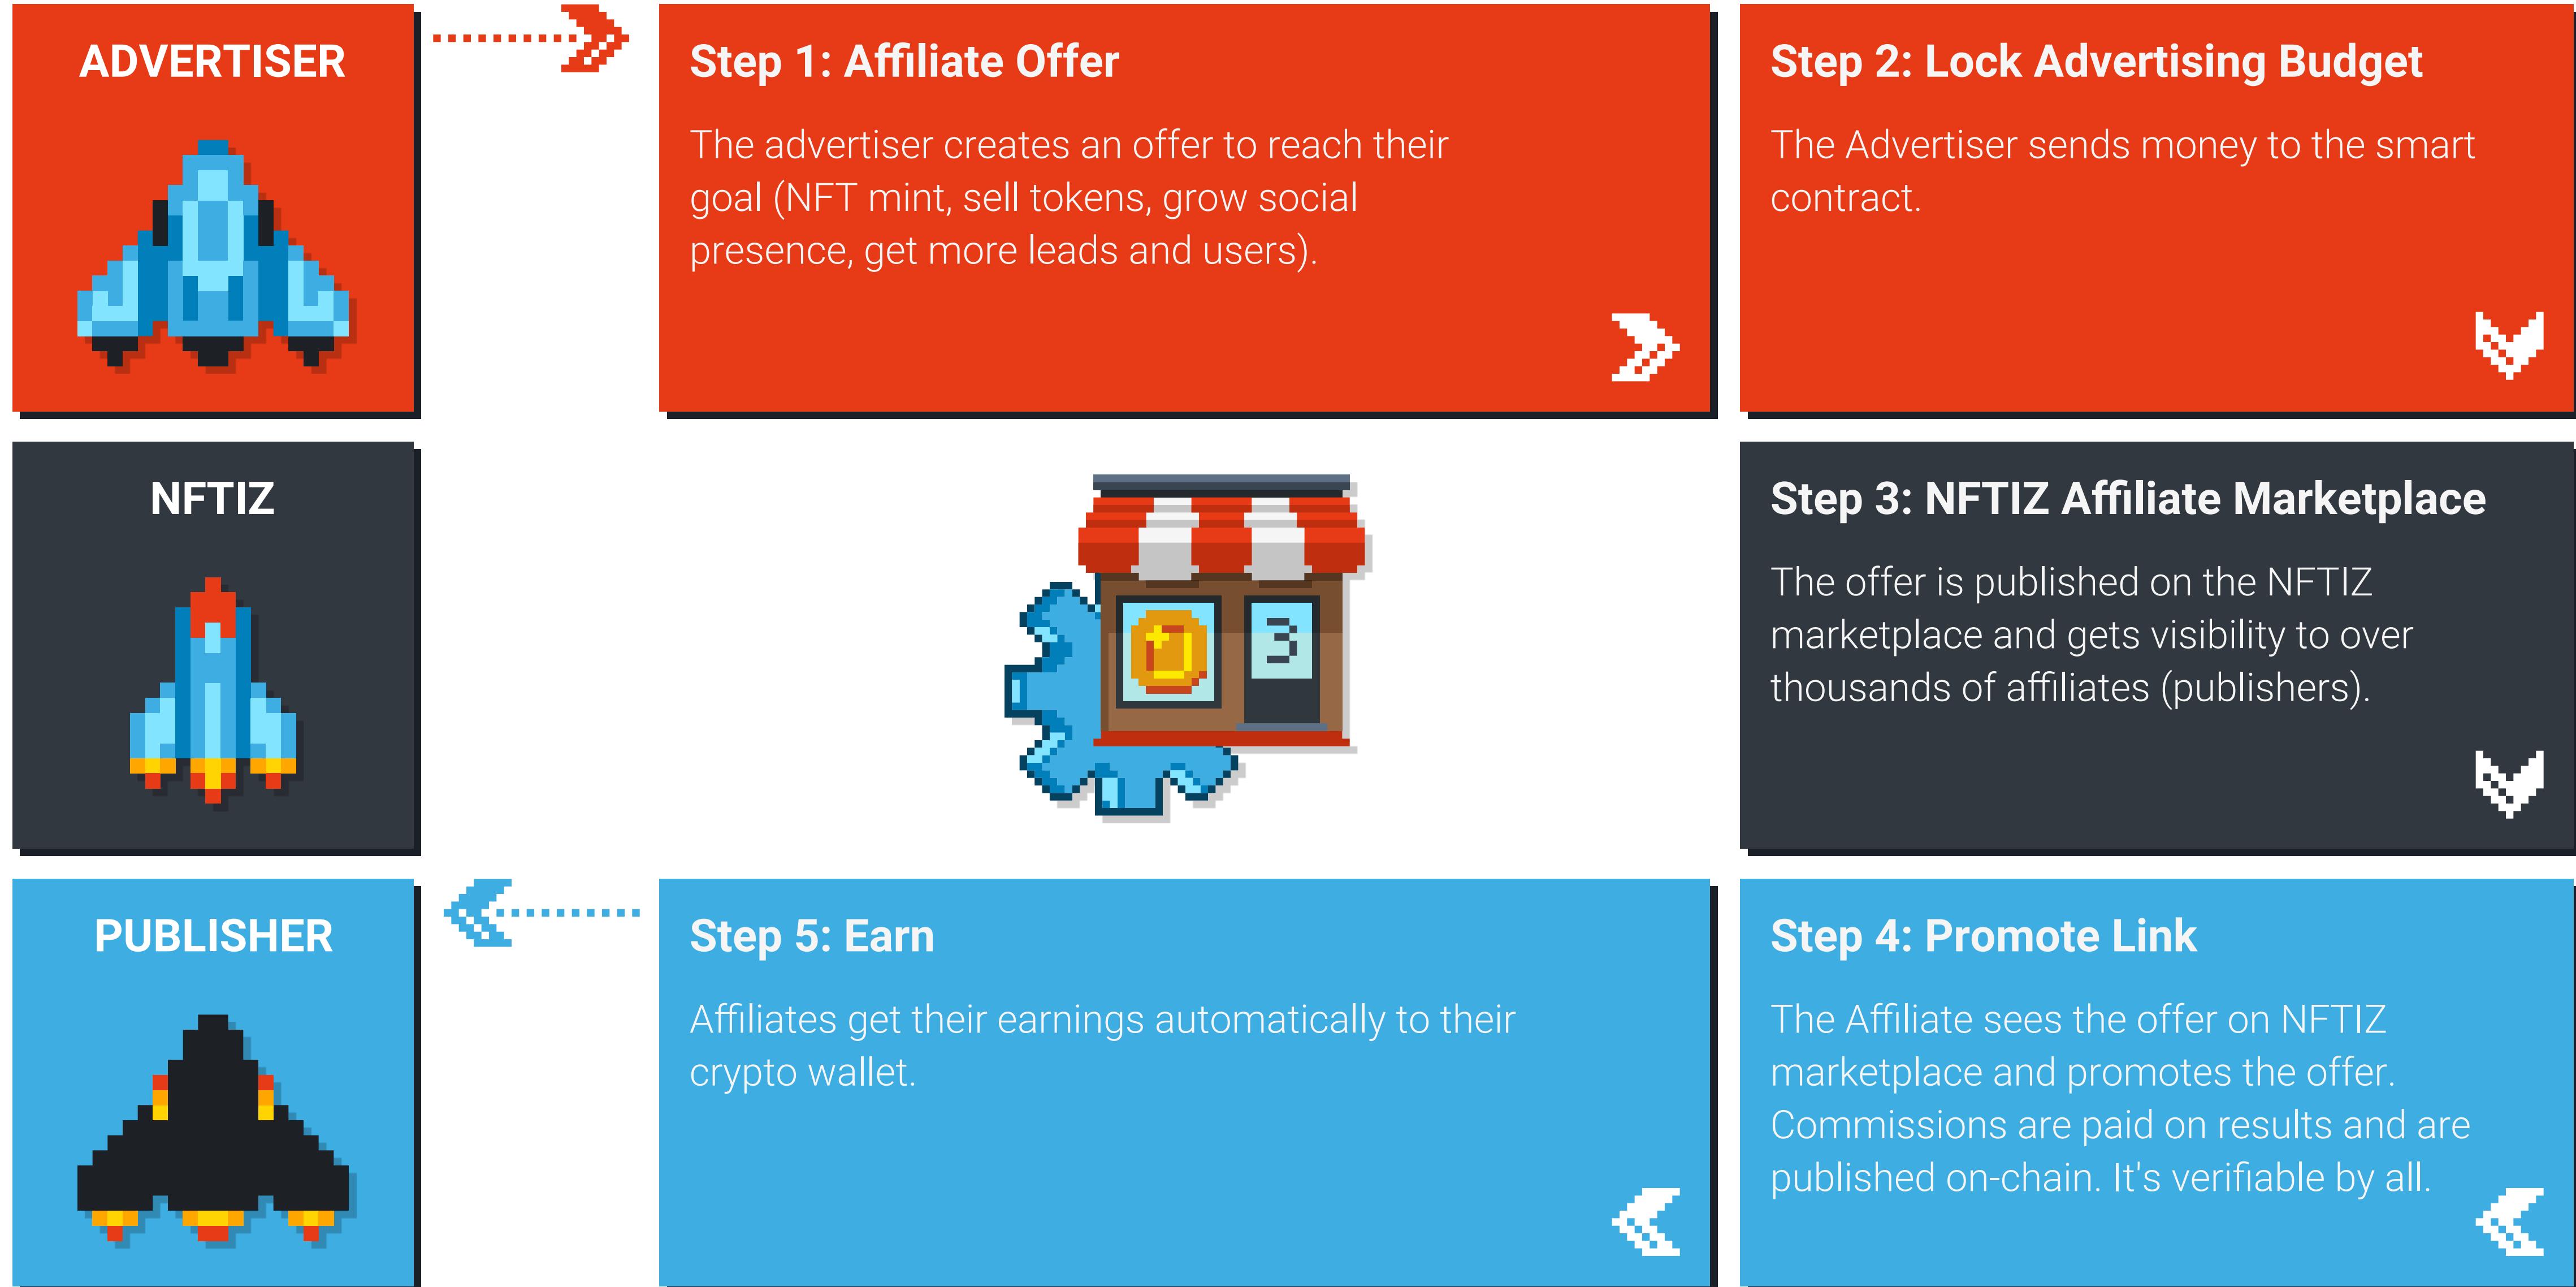

- We leverage blockchain to de-risk transactions and eliminate the need for bookkeeping. Transparent

- We use smart contracts so publishers get secure and instant payment. Trustless Payment

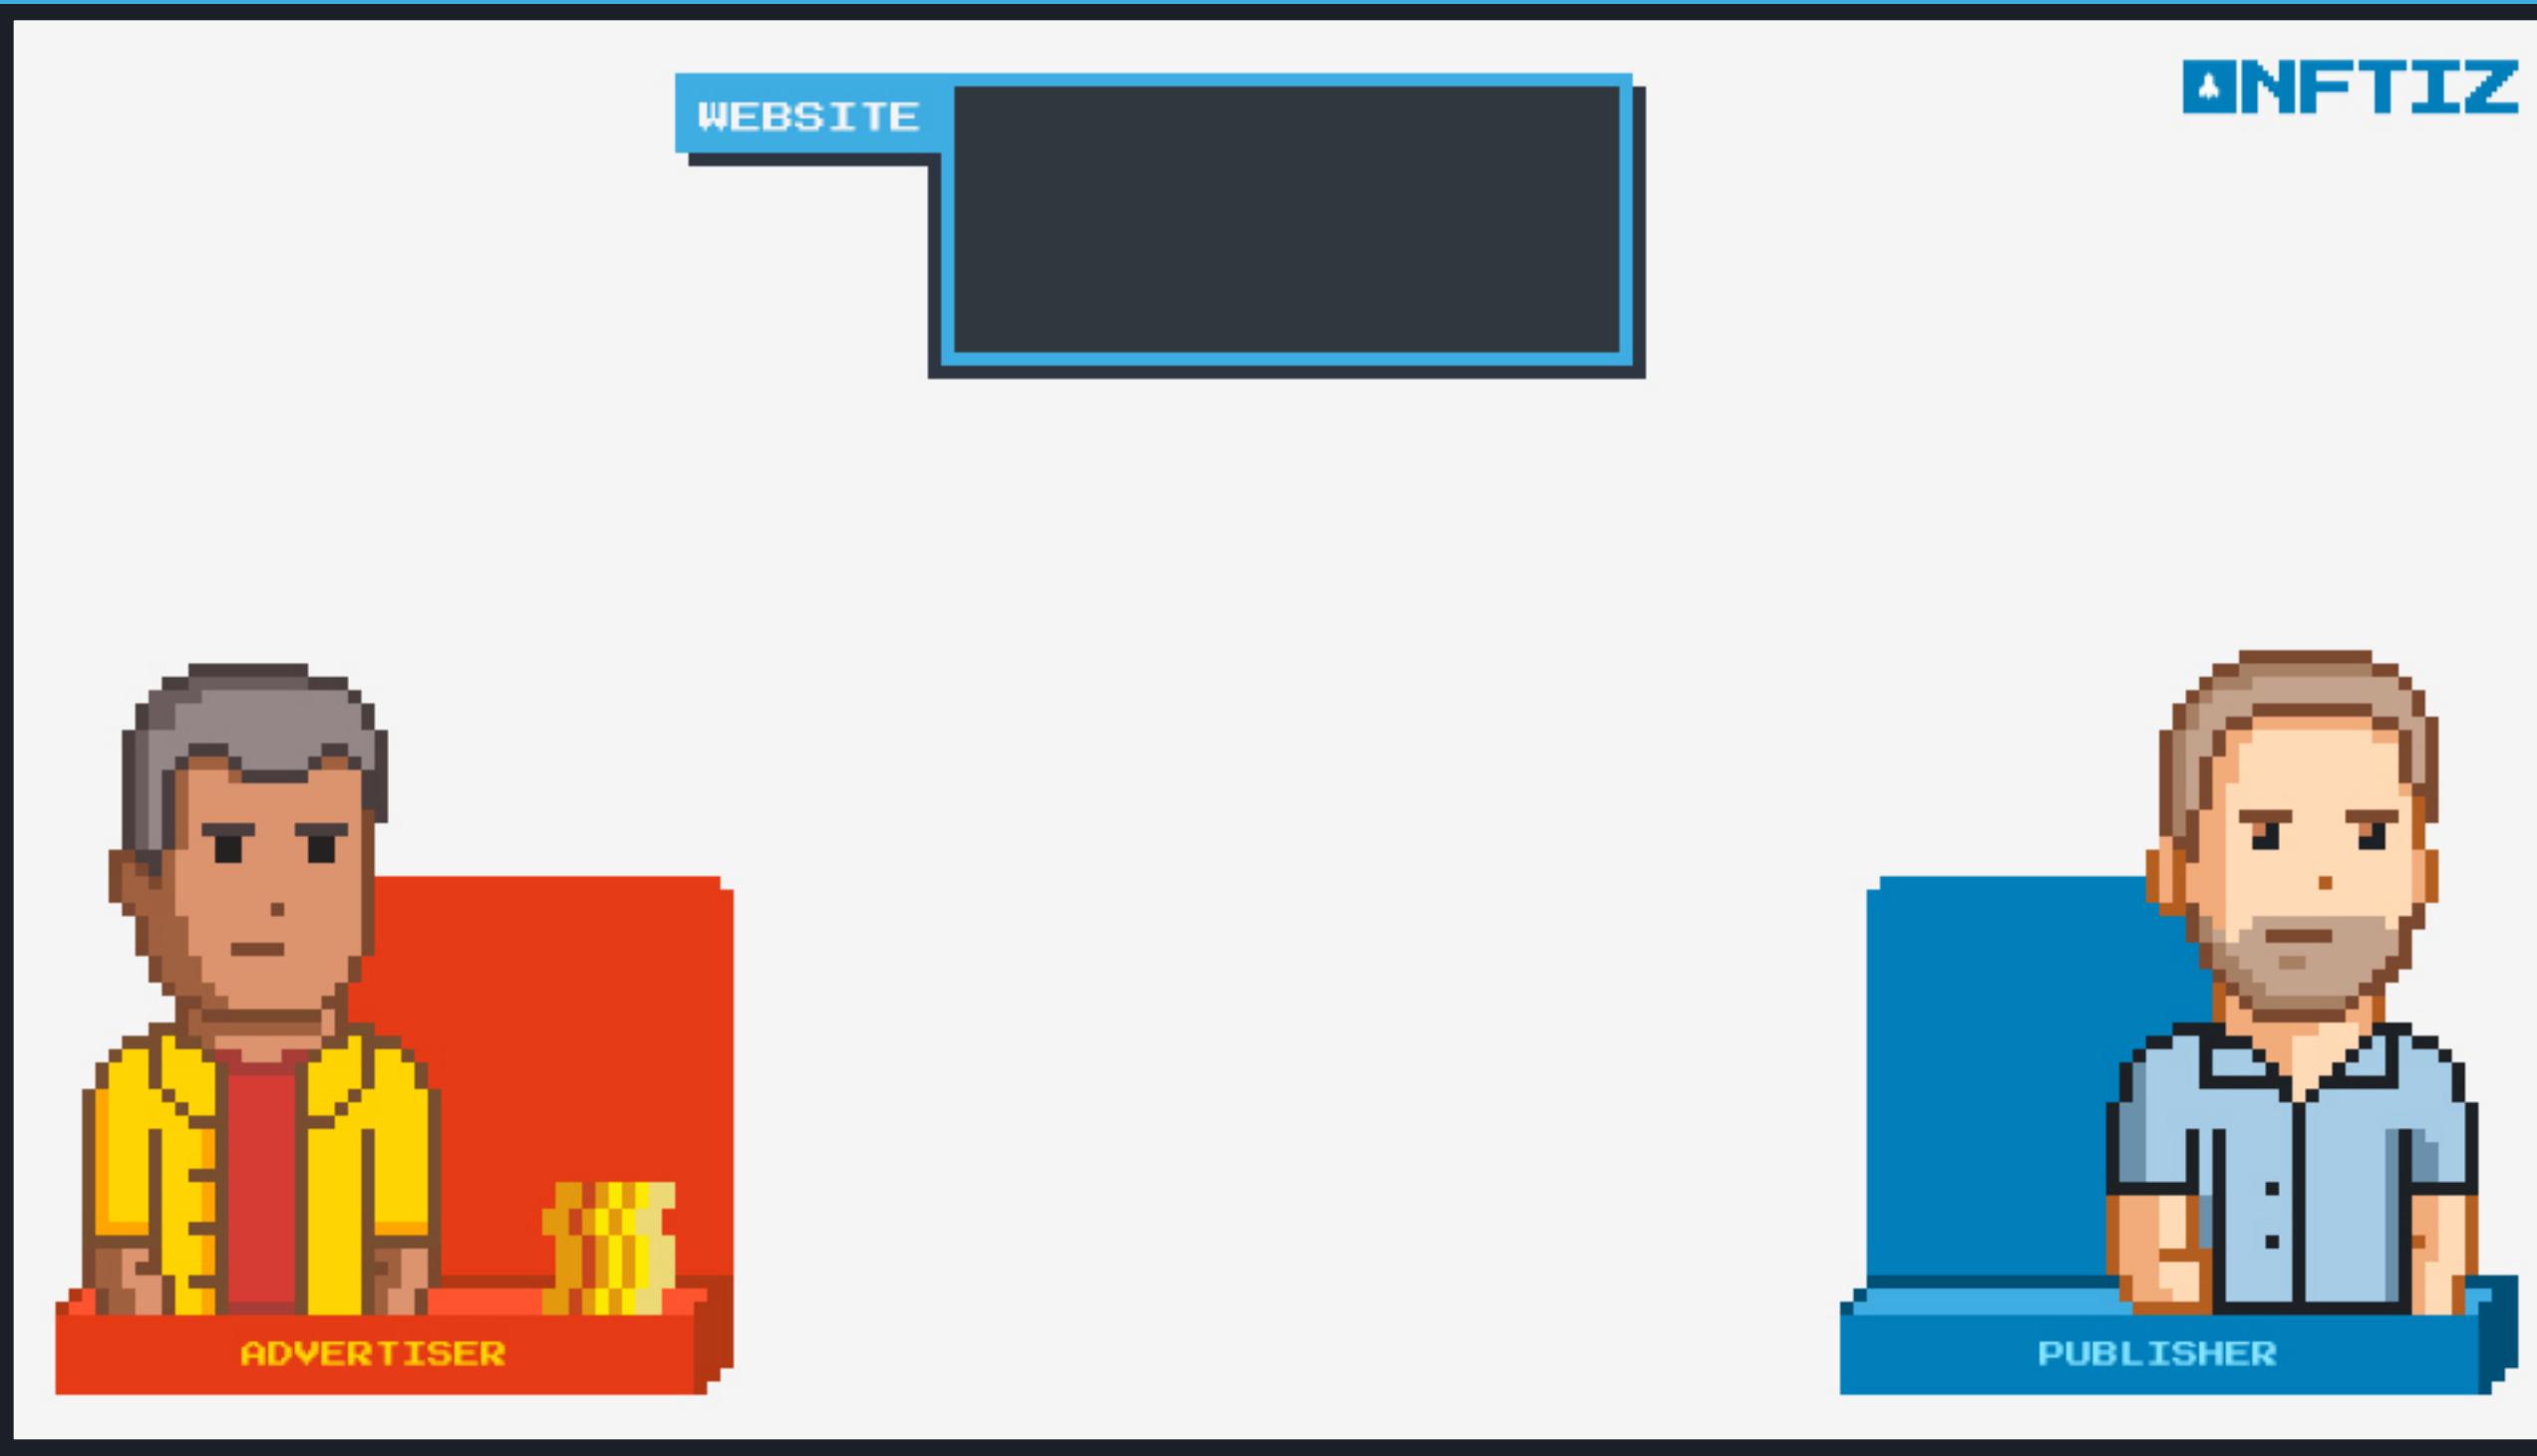

- We provide a web3 affiliate marketplace and enable publishers to promote new projects. New Industry

MECHANICS

HOW IT WORKS

See animation

HOW IT WORKS

The screenshot displays the NFTIZ platform interface, designed for publishers to manage and promote various offers.

Left Panel (Dashboard):

- NFTIZ FOR PUBLISHERS** logo
- Quick Search** input field
- SORT RESULT BY** dropdown with options: Rank (selected), New, and Filter

Payment Threshold	0\$	>100\$ + Terms & condition
Security	Funds are secured on a smart contract	Funds are not secured. Advertiser Can Elect Not To Pay. Publishers Can Collect Payment & Dissapear
Funds Custody	Blockchain Smart Contract.	Company Or Third Party Payment Processing (PayPal) MED-HIGH risk

COMPETITIVE ADVANTAGE

Strategic advantages if other competitors come to market

Four years in, we are already in a very competitive landscape & we are thriving.

- We are a strong & experienced team.
- With existing relationships & resources to leverage.

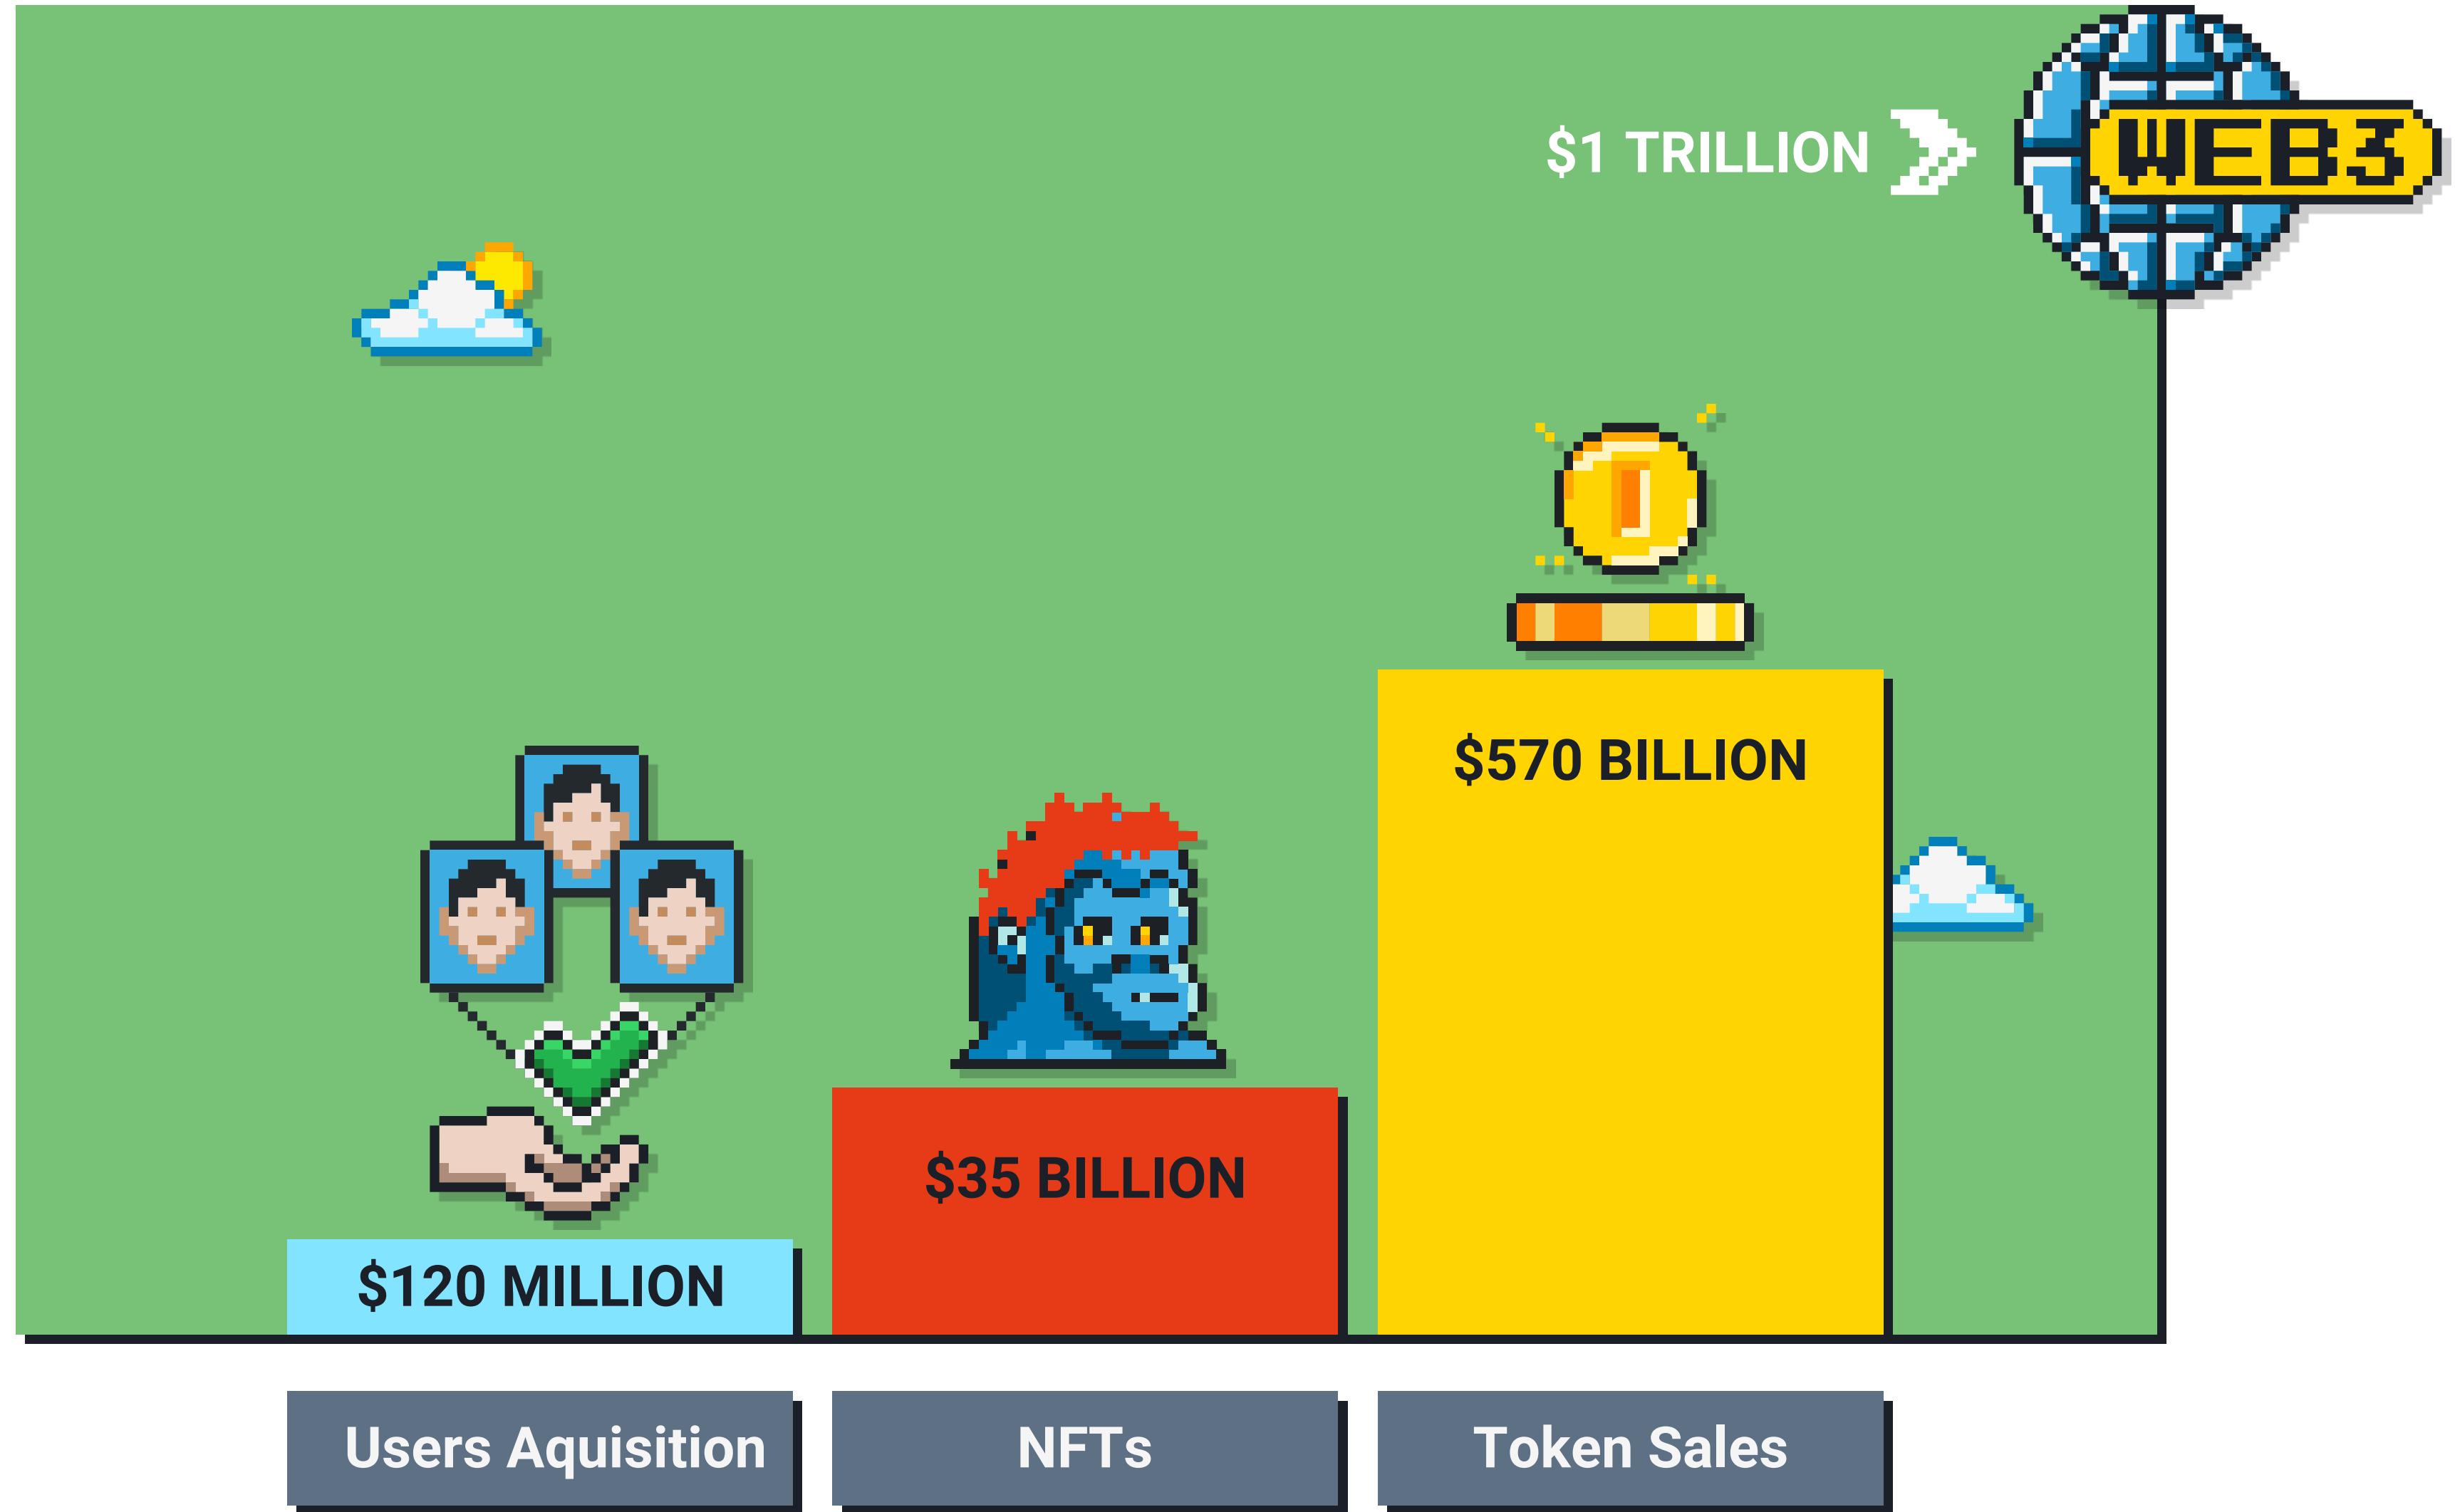

NFTIZ is a pioneer in blockchain technology & we are the first affiliate network to cross into the Web3 Industry.

- Smart contract
- Launchpad & Tracking system

We are leading. We already have traction :

- We launched our beta app in mid-October & already onboarded over 25 projects. **Santa Browser, Tdefi, and Capx**, to name a few.

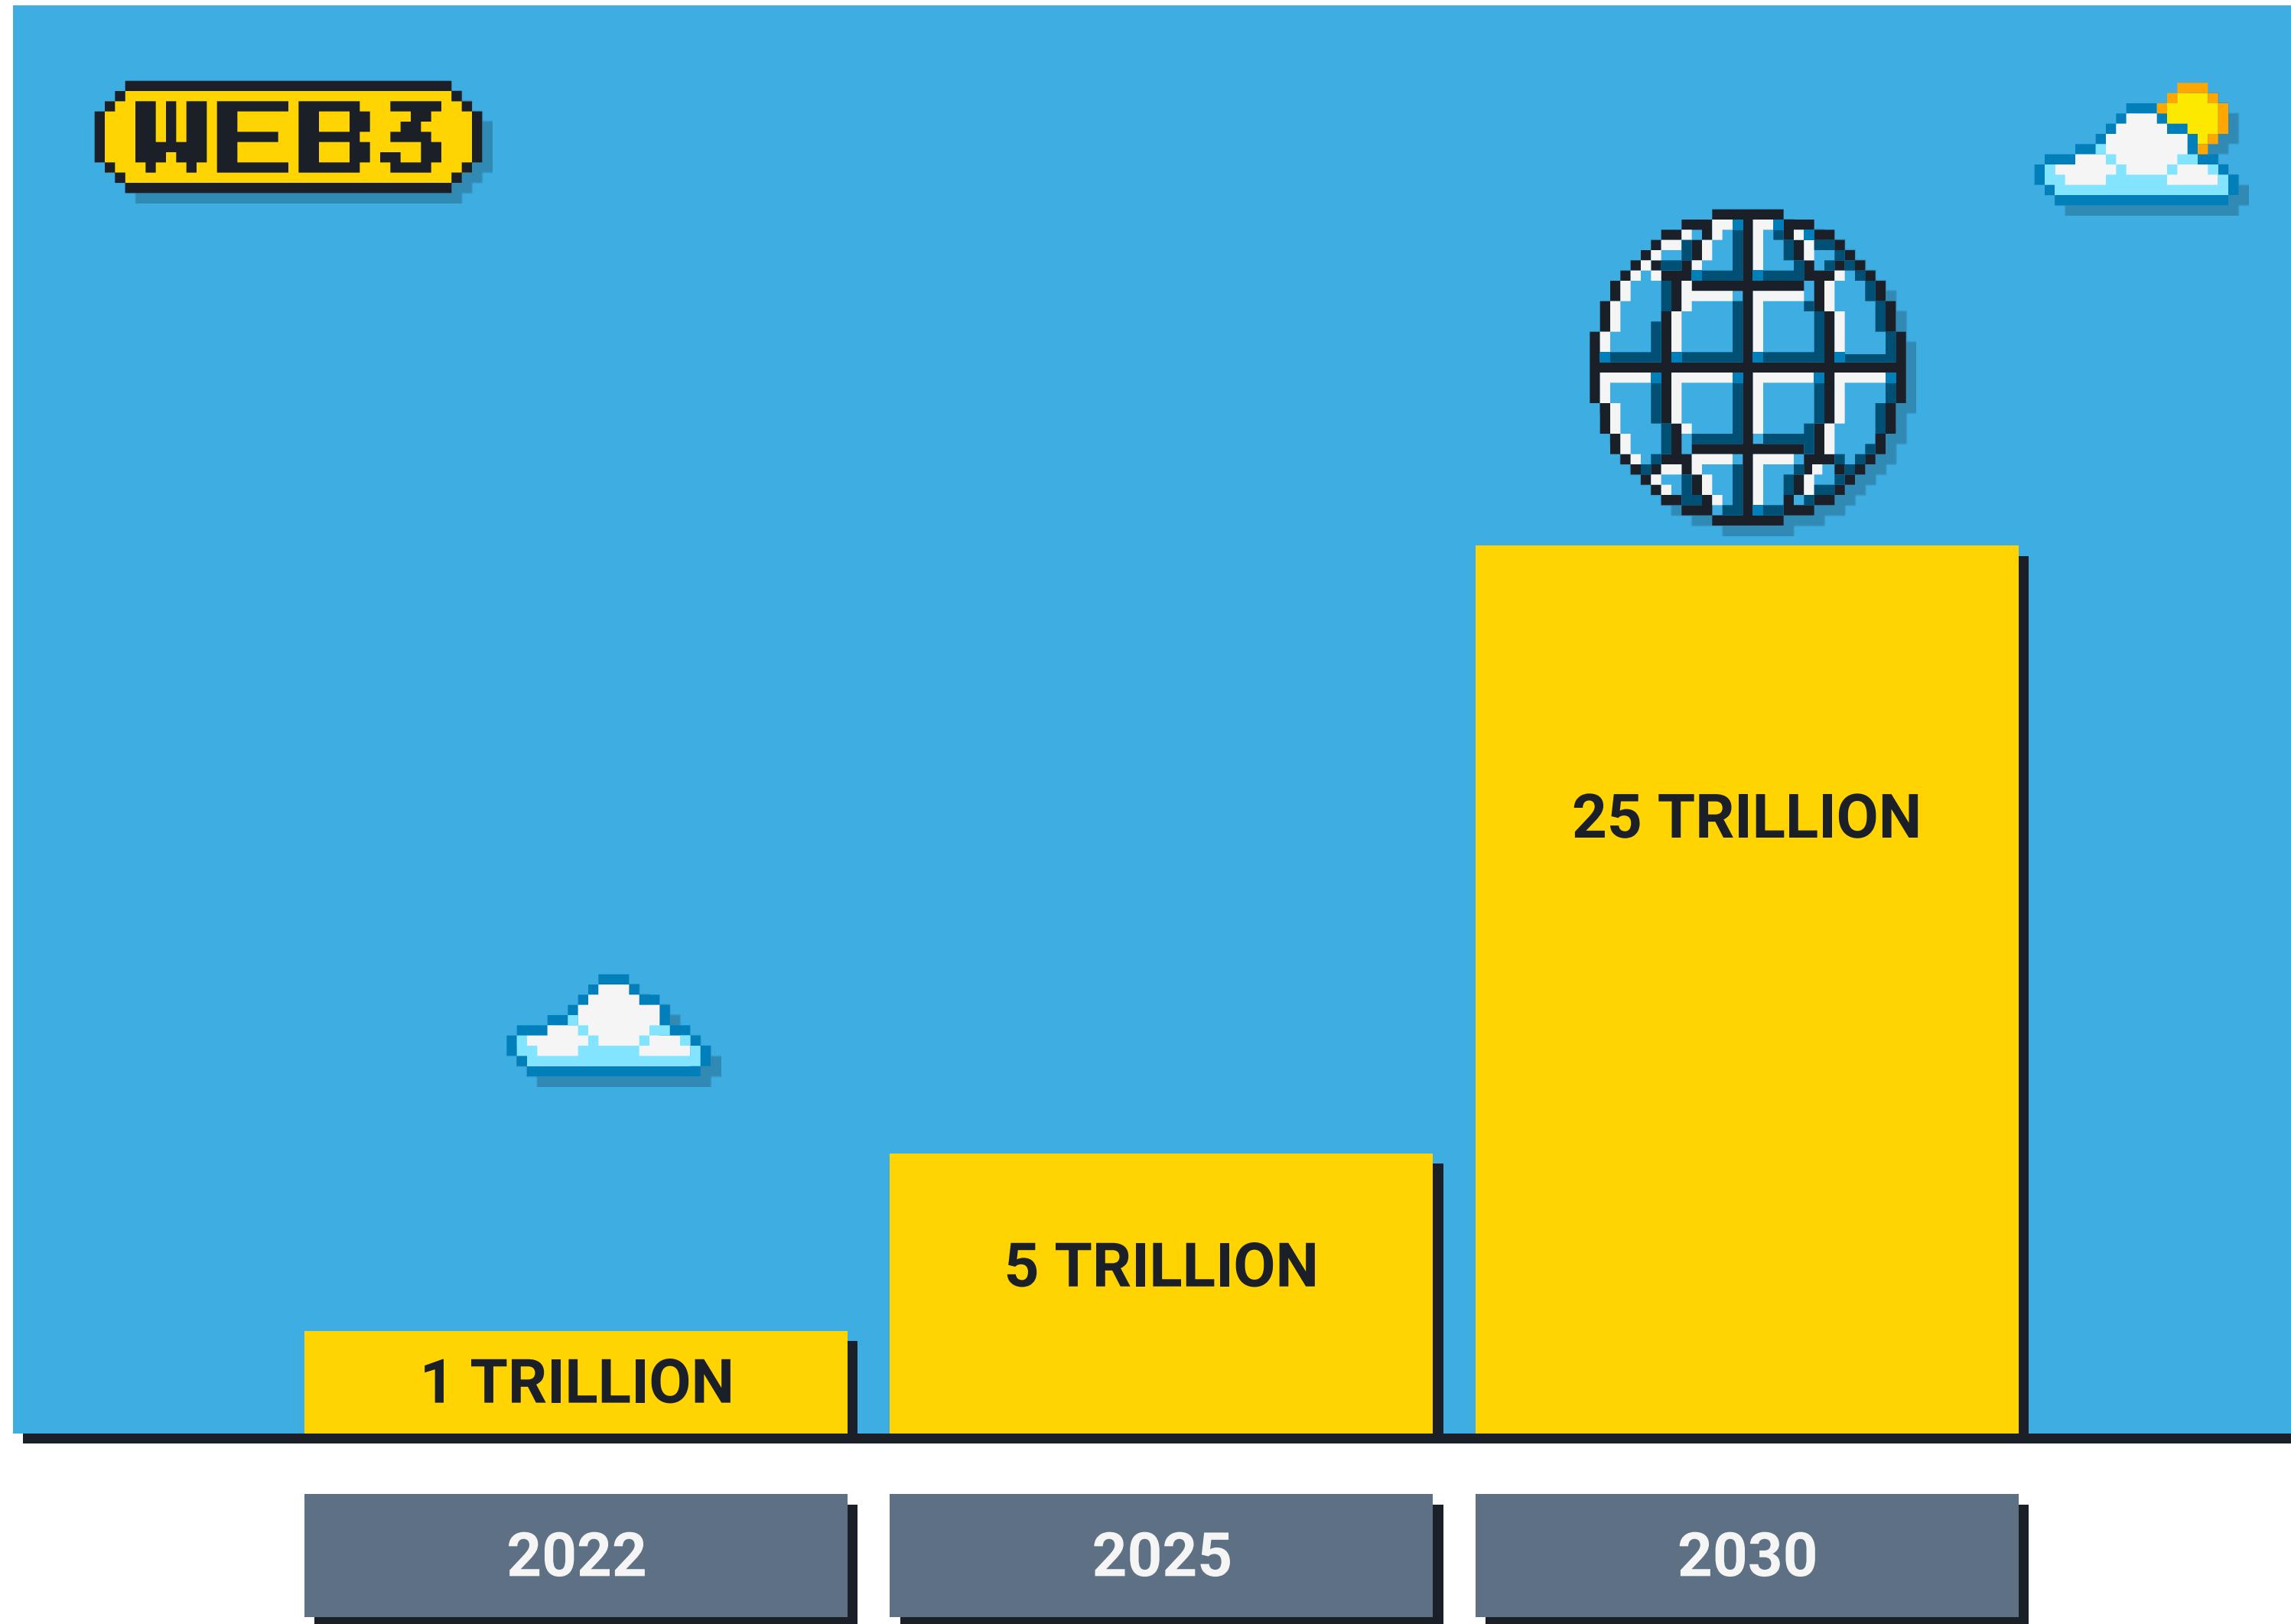

TOTAL ADDRESSABLE MARKET (TAM) - 2022
